

European  
Copper in  
Architecture  
Awards 18

Rules and  
Entry form

Sponsored by:  
European Copper Institute

## About the awards

The Copper in Architecture Awards promote and reward excellence in design by architects. To be eligible, all entries must incorporate cladding, roofing or other architectural elements of copper (bright, oxidised and patinated) or copper alloys, such as bronze and brass. (Note: Copper coatings or metals coated onto copper are not eligible). Shortlisted projects will be announced and promoted during June 2017, The Overall Winner, Commended projects and Public Choice Winner will be announced later in the year. All winning and commended projects will feature in extensive press coverage around Europe, as well as inclusion in a special Awards publication and coverage on the CopperConcept website.

## Architectural design award

The Awards are for recently completed buildings (between January 2015 and April 2017) across Europe, incorporating copper or copper alloy cladding, roofing or other architectural elements.

Winner's Prize: a prestigious piece of copper sculpture to keep.

Shortlisted and winning projects will be widely promoted to an international audience.

Architects and critics – drawn from a panel including some of the most influential designers in Europe – will judge all the entries on their architectural qualities from graphic submissions.

# How to submit your entry

Entries for the Architectural Design Award should be mounted on one or two A1 boards incorporating photographs and drawings of the project, highlighting the use of copper. They should include, or be accompanied by, a project description of approximately 250 words and the completed entry form identifying the name of the project and the entrant. Digital versions of all images (minimum 300dpi) must accompany each entry, together with a Word document of the project description.

Entrants may submit more than one entry. Photocopies of the entry form will be accepted. Entries and supporting materials will be retained by Copper in Architecture. The judges' decision will be final and no correspondence will be allowed.

**Completed entry forms, A1 boards and images should be sent to Copper in Architecture, to arrive no later than 30th April 2017.**

## **Information regarding use of images**

All images must be free of copyright and be available for unrestricted use or publication by, and on behalf of, Copper in Architecture and the European Copper in Architecture Campaign (ECAC) without payment of royalties. Copper in Architecture and ECAC reserve the right to use any photographs or images supplied in any promotional or technical materials, including publications (including Copper Architecture Forum) and websites.

## **Websites**

All entries will be displayed in the 'Awards' section of the [www.copperconcept.org](http://www.copperconcept.org) website. Each entry will consist of the project description, together with a number of images that will be selected from those submitted with the entry.

## **Copper Architecture Forum**

Selected entries will be featured in Copper Architecture Forum, the magazine of the European Copper in Architecture Campaign.

## **Copper in Architecture**

Part of the European Copper in Architecture Campaign, promoted by Copper Development Association and participating copper fabricators.

# Entry form

Completed entry forms and entry materials should be submitted by **30th April 2017** to Copper in Architecture.
